

FEST Timer

Microcement additive, to delay the setting time of microcement

DESCRIPTION

FEST Timer is an additive that extends the "open time" and workability of the **FESTFLOOR GO!**, **FESTFLOOR Life**, **FESTWALL Life** microcement and other two-component microcements (especially useful at high temperatures). The product noticeably delays the setting time of the microcement and allows easy cleaning of the tools after completion of the work.

KEY CHARACTERISTICS OF THE PRODUCT:

- odorless,
- compatible with most two-component microcements available on the market,
- does not affect the hardness of the microcement.

APPLICATION

The product is added to the microcement in a proportion of 1 to 3% by weight of the microcement (powder + polymer).

In case of two-component microcements, it is best to add it to the polymer, mix it and then mix it again thoroughly with the dry powder as usual.

TECHNICAL DATA

- Color: milky
- Shelf life: 12 months (store the product at temperatures above 15°C, protect against frost)

PACKAGING

FEST Timer is available in packages of 1l.

CLEANING OF TOOLS

Cleaning of tools should be carried out with water.

SAFETY AND HEALTH

- Causes serious eye irritation.
- If medical attention is needed, have the product container or label on hand.
- Keep out of reach of children.
- Keep container tightly closed.
- Contact a doctor if you feel unwell.
- Dispose of waste at special collection points.
